HOBBIES

Recent Projects

Nottwitter - Twitter Clone

Pug, CSS3, JavaScript, Node.js, Express, Mongoose, MongoDB, Socket.io, Multer
Full-stack node.js Twitter clone with a REST API. Users can create an account, post a tweet, like and retweet, follow and unfollow, search posts & users, upload profile, and cover photo with a layer copper.js along with functionality of single and group chat, login & signup using sessions and real-time notification using socket.io.

AirHouse - Airbnb Clone

MongoDB, Express, React, Node.js, GraphQL, Apollo boost, TypeScript, OAuth, JWT, Stripe, Ant Design
Create a GraphQL API using express and Node.js with Apollo layer. Use React Apollo and the Apollo CLI to handle GraphQL requests. Avoid bugs by using TypeScript and persist data to the MongoDB database. Handle payments with Stripe. OAuth Authentication for Google Sign-In. Location searching with Google's Geocode API. Date validation with moment package and AntDesign for UI.

AyaKaffee - eCommerce Store

MongoDB, Express, React, Redux, Node.js, JavaScript, JWT, PayPal
Full MERN stack application. Built REST API using Express and Node.js. Persist data to the MongoDB with a mongoose layer. jsonwebtoken for authentication. LocalStorage for the Shopping cart. Front End is made with Bootstrap. The shop has product reviews, ratings, top 4 products carousel, pagination, Search Products on keywords, User profile, Orders List, Admin product and user management, Order Management, and PayPal integration.

Dear Future Employer,

This cover letter is to express my interest in your job posting. With a Bachelor's degree in Electronics and Information Technology, a Master's degree in Computer and Communication Technology currently on hold, and hands-on experience as a full-stack developer to be able to create and implement full-stack applications, I am confident that I will be a valuable asset to your organization goals.

I enjoy working on challenging projects that require me to work outside my comfort and knowledge set. I believe in following the latest trends and development technologies as they are important for me and the success of your organization. I am currently using MERN stack with GraphQL and Typescript for building applications. I have also completed and pursuing various certifications /trainings to stay relevant when it comes to the latest trends.

During the covid time, I spent most of my time improving my skills by working on full-stack projects such as building Twitter and Airbnb clones which can be seen on my website. I understand the importance of time management and open communication. I am looking to work at a place where I can work full-time for a long time. I would like to highlight some points that would enable me to contribute to your company.

- Skilled in designing, testing, and developing applications
- Understanding of data structures and algorithms
- Good Knowledge of back-end development best practices
- Good knowledge of User Experience Design

I've attached a copy of my resume that briefly details my projects and experience in development. For the first time, I prefer to be reached via email at uxdkhan@gmail.com.

Thank you for your time and consideration. I look forward to speaking with you about this opportunity.
